10. CONCLUSION

Astronomical (METEOR) ✓ Subject to change if duration proven to be long. JPB

Not reported as an unidentified object. Reported as an unusual meteor sighting.

11. BRIEF SUMMARY AND ANALYSIS

Witness reported object as an apparent falling meteorite. Looked like a helo with windows having a bright light. As object moved Northward red and green colors were apparent. The red and greens dissapated like a meteor. WX clear with possibility of high Cirrus, because the Stars were not bright.

29 May 1965

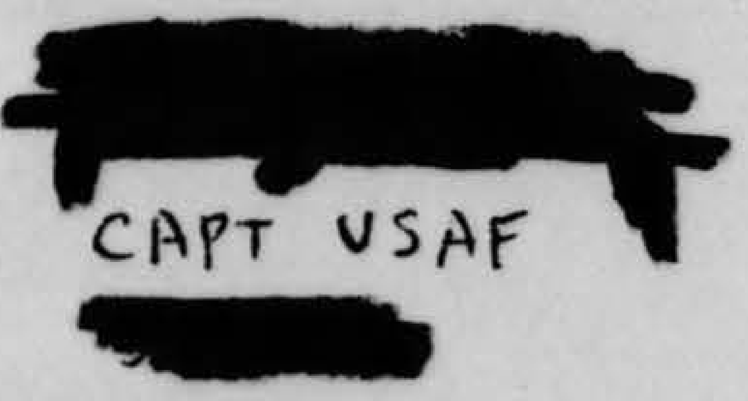

SUBJECT: UFO REPORT

TO: RESEARCH AND DEVELOPMENT COMMAND
WRIGHT PATTERSON AFB, OHIO

While driving eastward at 1946 EST, 29 May 65, I observed an "apparent" unusual falling meteorite. The attached page showed my poor observation.

I thought I saw a helicopter which had all it's windows having a bright white light. Then other colors appeared as it moved apparently northward and were mainly red and green. The colors then weakened as the UFO moved further northward and dissipated like a meteorite.

The weather was clear except for thin middle clouds to the north. There may have been thin cirrus clouds because the stars were not bright.
